today's mail*

Good Morning,

I am writing to thank you for your involvement in the Texas Business for Clean Air coalition.

I am a veterinarian and a small business man. I got into politics because of my involvement on the boards of Texas Association of Business and the National Federation of Independent Businesses. My primary interest has always been to foster a great business climate in Texas and therefore a growing and better Texas.

As you know, being a good steward of our environment as well as being a good business person are two entirely compatible goals. I took some flak as a conservative Republican introducing the legislation for a moratorium on the 18 proposed pulverized coal plant permits. My Dad always advised me to face front the storm and do the right thing. I know that it was the right thing to do for Central Texas and for the entire state. I was also pleased to introduce legislation to provide incentives for cleaner technology for electrical generation as well as legislation to improve communication between ERCOT, the TCEQ and the PUC.

If there is anything that I can do for you in Austin, please do not hesitate to call or drop by. We would be glad to arrange a tour of the capitol for you or your family.

Together we have succeeded in slowing down a potentially serious environmental problem. Thank you very much for your participation in and support of clean air and a continuing great and growing business climate for our great state.

God bless Texas.

Sincerely,

*Charles "Doc" Anderson*
